Mines and Prospects-Furnaces and Mills

Talent From Utah Acquires New Mines

Final Payment Made Yesterday and Organization of a Million Dollar Company Follows Quickly.

FORK IS BOOMING.

Properties Now in Operation in the Old Region of Producers.

AMERICAN FORK, April 8 - American Fork canyon is now nearing a point AMERICAN FORK, April 8 - American Fork canyon is now nearing a point where it will be very easily accessible by prospectors, who are anxiously awaiting like opportunity to enter. The deep snow has subsided until it offers practically no obstruction. The snow is two feeteight inches deep on Blue Rock-flat, and the Dutchman mine is easily accessible by team. The present operating mines are as follows: Wyoming, by Mr George Tyng; the Healy, by the American Fork Mining company; the Whirlwind, by the Whirlwind Mining and Milling company; the Blue Rock, by the Pacific Gold Mining and Milling company, and also the Dutchman Mining company, and also the Dutchman Mining company, and also the Dutchman mine, by the latter company. Those that are now under active preparations are the following: Clipper and Silver King, which will commence next week, by the Clipper and Silver King Consolidated Mining company; the Signet mine, by the Signet Mining company of this place. The Silver Flat property will also commence work, as will the Ontario mine, in the very near future. Local mining men are enthusiastle over the promising appearance of the caryon, and are looking forward to some very big things this summer.

UNCLE SAM EARNINGS.

Tintic Company Ready to Enter Dividend Column Again.

That a dividend was not posted by the Uncle Sam of Tintic at the meeting of its board of directors during the afternoon was not that the contents of the treasury did not justify it, said an official of the company last night. It was simply that there was a split on the question of expediency, and it was decided to defer the announcement until May, when connection will have been made with the new channel of ore on the 500-foot level and the management thus enabled to move economically levy upon its resources. In other words connection with the channel at that depth will enable the company to produce its ores with one handling, while at this time it is impossible to do so without resorting to transfers, ail of which incurs an expense. Having resigned themselves to the present interval between dividends the sharehold-ry will find it possible to wait another month. That a dividend was not posted by the

MR. COHEN TO ARRIVE.

Comes to Inquire Into Fortune Which Bingham Is to Afford.

Among those for whom reservation was made at the hotels during the day, and who will arrive from the west to utilize them this morning, is none other than Hartwig A. Cohen, former manager of the Con. Mercur mines and for many years the chief of Capt. J. R. De La Mar's staff of experts. Mr Cohen, who has been devoting himself to the far Western interests of the captain, comes to Utah at this time to inquire into conditions at the properties of the Dtah Copper company at Bingham, and with the organization of which company he was prominently identified. It was whild he was associated with the De La Mar staff that the merits of the copper-bearing perphyrics of Bingham appealed to him, and when the hour came to hook them up for commercial results he was on the ground.

Boston Market Strong.

Special to The Tribune. Special to The Tribune.

BOSTON, Mass., April &—The Boston market opened strong and active, with copper shares the feature. Interest contered in these shares all day and trading in them is increasing each day. Local interests are getting quite enthusiastic and are being helped along by a good display of buying orders from New York. The advance in Amalgamated is having an effect on commission houses, where orders appear to be on the increase. The market closed inactive and strong, Horniblower & Weeks, brokers, SI State street, Hoston, and 10 Wall street, New York, furnish the following quotations:

Sales High. Low. Close.

Amalgamated Bingham	BOO	231.871/2	231 1014	\$94 WY17

Cleghorn in the Canyon.

Special to The Tribune.

AMERICAN FORK, April 8—John Cleghorn, the well-known miner, who has just returned from the Goldheld district, where he was year year-year-greefit in becating valuable property, on which the development work is being very aprilly pussied, intends a trip into American Fork causen, with the intention of investigating canyon property. Mr. Cleghorn is morn resting canyon property. Mr. Cleghorn is morn specially interested in the Lopeer King, known as the Oil Nebraskas. This mine is owned by local mining men and he considered one of the most promising in the canyon. The group of the most promising in the canyon. The first fail to the opening up of a large vein of galeria, which is not well. In case Mr. Cleghorn decided to invest in the Copper King he will head development work, which the company has outlined.

Shop and residence, 767 South

THE WEEK ON 'CHANGE.

Bears Again Ugly, With Many Marking Up Acute Losses.

The week on the mining exchange closed on the sale of 243,759 shares, for which

\$56,047.82 was paid, and with the more ctive traders with rare exceptions, suf tering acutely from their experiences with the bear. Nor was this condition made possible through any infirmity on the part of the traders. On the contrary, not one of the crippled that has not added to its The Chief Kawich Mines company, its acquisitions among the most valuable on the gold-hearing zone in Goldreed mining district. Nye country, Nevada, its founders including a cluster of the wealthnest and most experienced of Urah mining men, was hanched yesterdag, with a capitalization of \$1.090,005. Stricted into as many shares of the ray value of \$1. Thomas f. Lynch, whose endeavors in Nevada have calminated in as many triumphs since he brushed the dust of this commonwealth from his digging boots and invaded that arena, is the president of the new organization, with M. F. Lynch its vice-president, while William W. Armstrong will serve it as secretary and treasurer, these officials, with E. G. Kidder and Charles Heath, to constituty the board of directors. The personnel of this household cannot but commend the undertaking as a meritorious one, while that Fresident Lynch and his associates in Nevada have certified to it with their findings verified by Mr. Armstrong and his staff, affords an emphasis that no miner will discretel.

The properties with which the Chief Kawich company begins its operations in the region of gold, addoin the original discovery at Kawich or Goldreed, and include the Growler, the Washington, Warstergland Company begins its operations in the region of gold, addoin the original discovery at Kawich or Goldreed, and include the Growler, the Washington, Warstergland Iroberg, Upon each of these sold-bearing rock identical in its characteristics with that of the original file of the management of Mr. Lynch systematic development will be inaugurated at once. From these acquisitions find in the camp, has been encountered, and under the management of Mr. Lynch systematic development will be inaugurated at once. From these acquisitions find in the camp, has been encountered, and under the management of Mr. Lynch systematic development will be inaugurated at once. From these acquisitions find in the camp, has been encountered, and under the management of Mr. Lynch systematic development will be inaug physical resources. May Day, which was

The Latham's Experiment.

The experiments on carbonate erres from the Latham company's Nevada mines, at the Ohio company's mill. Bincham, have been compenyed and results forwarded to the management at Dayton 6, raid Dr. Singler esteries. The experiments at the Ohio hard continued him that the dry mathed is the heater adapted to the requirements of the Lather hands he added, and equipment along these lines will be proceeded with.

Cyanide Plant for Lincoln Mines

Management Authorized to Proceed at Once With the Equipment of the Properties.

George Z. Edwards, general superin-tendent of the properties of the Lincoln Mining company out of Boire, Ida, came down from the north again yesterday to visit with his family and to incidentally look after extensive interests in this State, with the mines of which he was identified for so long a time. Of the properties of his company in the north Mr. Edwards, who has added materially to their resources since he consented to take charge of them, says they will be equipped at an early day with a cyanida plant, the tests which have been made by him along experimental lines having been with the most satisfactory results. He has already received orders from the East, indeed, to proceed with the construction of the cyanide mill and will place his contracts for the structural material the present month. The new shaft which is being put down on the property has now reached a depth of 300 feet, and will continue dropping down until a depth of 80 is reached. Meanwhile the concentrator has been hung up indefinitely, as the better results are to be had from the cyanidation of the ores. He reports a great deal of activity in the region. The mill with which the Kentucky company has equipped its properties has gone into commission and is doing its work most satisfactorily, while a number of others are developing and will probably install their plants as soon as the Lincoln shall have demonstrated to them with the adult mill that cyanidation is the method from which the better results are to be derived in that camp Edwards, who has added materially to

LOST PACKER BIG MINE.

Idaho Visitor Discusses It-A Silver-Lead Discovery.

Judge William A. Crawford of Riverside. Ida., was among the day's visitors from the north, this the first time he has from the north, this the first time he has looked in upon Zion since he was altached to the Washich group at Park City. Judge Crawford is now interested in properties about a mile and a half distant from Loon Creek, home of the Lost Packer mines, and from his locations brought samples of ore identical with that occurring in the Packer. In the same locality is the Metcalf group of mines, of which Senator Rassenel Macbeth is one of the owners, the ores of which ten feet has been exposed, showing from 30 to 40 per cent lead with an average of 50 ounces allyer, from 5 to 10 per cent copper and 55 to 510 gold per ton. That the marketing of ores from this source has not begun is that a long haul contravenes.

LESSEES VERSUS BECK

Insist Upon Being Paid for Damages Sustained by Them.

damage suit will soon be filed against the Bullion-Beck and Champion Mining company by Irwin Spriggs, Oille Baker, company by Irwin Spriggs, Oille Baker, Alber Larsen and others, who, about ten months ago, held a lease on the 600-foot level of the above company's mine, says the Eureka Reporter. The lease was to the south of the shaft, and after the leasers had spent considerable money they struck a nice body of ore, which they followed into an old stope a short distance from the line separating the Beck and Eureka Hill mines. Considerable rich ore, it is alleged, has been taken from this stope by the Eureka Hill Mining company, but there is still a larga quantity of this high-grade ore left, but the leasers were not allowed to continue work because of the suits for damages the leasers were not allowed to continue work because of the suits for damages now pending against the Eureka Hill Mining company. Messes, Spriggs, Baker and Larsen claim that they are entitled to the ere which is in this block of ground co gred by their lease and will ask for damages in the sum of \$50.00. They have retained Fowers & Marion-caux to look after their interests,

ORES AND BULLION.

Settlements in Open Market With Output of Copper Plants.

In the ore and bullion market the week closed on settlements amounting to \$449.-800, the exhibit, which is sustaining all the claims of the producer, affording a slight improvement over that of the previous week.

Meanwhile the output of the "copper

Meanwhile the output of the "copper plants" attained a figure that exceeded all previous records, the more prenounced of the gains that made at the furnaces of the United States, which were in receipt of greatly incrensed tonnages from the company's system of mines at Tintic, although the neighbors each maintained a record that was up to all previous ones. In the open market the day's settlements amounted to \$72.500, McCornick & Co. reporting them as they follow: Bullion, \$35.500; gold, silver, lead and copper ores, \$33,900.

In the metal market silver ruled at \$55/2 cents an ounce, lead at \$3.50024.50 per hundered pounds, and casting copper at 14% cents a pound.

THE ONTARIO'S WATERS.

Situation Relieved Somewhat by Steady Flow From Tunnel.

Manager Rood of the Ontario, whe came lewn from Park City Friday night, reports the flow of water from the tunnel ports the flow of water from the tunnel now averaging 4900 gallons per minute, and while the flood is rising at the rate of about seven feet dally, the work of drifting around the slide is now progressing in such manner as to encourage the belief that the situation will be relieved in short time.

At the Daly the Federal tunnel is advancing steadily to a connection with the channel opened up some time ago in Mazepa ground, and while there are no means of determining when the connection shall be effected, it is not believed to be remote.

be remote

At the Natidriver, of which he is also
the manager, Mr. Rood says the condition
generally is unchanged and conferses
that operations at the New York are interesting him profoundly.

Down With the Gold.

With a consignment of gold buillon of the value of \$120, Henry Barker, superintendent of the Gold Dust company's mines in Lembi county, idahe came down from camp yesterday. He reports the null in steady operation, after slight alterations, and giving very satisfactory results. He will have for his diggings again the present week.

Quincy Sacking Ores.

During the week ending April 1 there was sacked at the properties of the Quincy com-pany in Alta over of the value of \$10%, said Abox Calbath yesterday, and that as much With Lon Jeffs, he will depart for

GODIVA MILLING ORES.

Tests Being Made With a View to Installing a Plant.

The Reporter, telling of conditions in Fintle, says: Superintendent McChrystal is now making some tests on Godiva mill-ing ore with a hand jig which has been put up at the mine this week. There is nothing particularly new at the Godlya, but Mr. McChrystal says that the condition of the mine appears to be improv-ing. One carload of nice ore was sent out

ing. One carload of nice ore was sent out this week.

John Davis was in from his North Tintle property yesterday for the purpose of getting assays on some splendid looking rock recently encountered in the tunnel which he run in a distance of over 259 feet for the purpose of tapping the vein. This will give a depth of 110 feet and Mr. Davis, who has been identified with the mining industry of Tinite for many years, believes that he has a splendid mine. Mr. Davis's claims are called the Chloride group, east of the ground owned by the Sweetwater Mining company.

William Stauffenberg and Thomas Burns left yesterday for the new Urah property in the Erickson district, with sufficient supplies to last one month. The ore which was taken from the shaft a short time ago showed values of 24 per cent copper and some little silver and gold. Mr. Stauffenberg is of the opinion that he will be able to take out a small shipment of ore during the next month. The New Utah is about twenty miles from the railroad and is but a short distance from the ground owned by Herman Hoesch and associates who intend putting up a mattling plant this season.

Eureka people who own mining ground in Barney's Hellow in the Blingham district are greatly encouraged by the reports which have been sent out from that section recently. At the Oxford group, owned by Mesers, Crooks, Spriggs, Owens and others of this city, there is a shaft down 125 feet, and it is quite likely that considerable development work will be done this season.

MILLS AT SEARCHLIGHT.

Forty Stamps Now Dropping on Ores of Good Quality.

A special correspondent of the Mining Reporter, Denver, writing of Scarchlight, off the line of the San Pedro Route, says: "In the district there are five stamp nills with an aggregate of ninety stamps forty of which are now dropping. The average value of the ores milled is over \$20, these values being almost exclusively gold. A fact proven by developments and one well worthy of note, is the Increase in size of the ore-bodies with depth. The ore values are generally more uniform and higher as well.

Searchicht is the ores with the state of the ores.

ore values are generally more uniform and higher as well.

"Searchlight is distant from Manvel, San Fernardino county. California, on the Ivanpah branch of the Santa Fe railroad, about twenty-six miles, to which there is a thrice-a-week stage and mail service. From Nippeno, on the San Ferro, Los Angeles & Salt Lake railroad, to the west, a wagon road of twenty-three miles is being laid out, and it is probable that the bulk of the travel will row be via this route, as soon as regular freight and passeoger service between Salt Lake and Los Angeles is imagurated. We learn also that the Santa Fe railroad has under consideration the early construction of a line from hex station, seventeen miles east of Goffs on the main Santa Fe line, to the Searchlight camp, a alstance of about thirty-eight miles."

GOES TO MAMMOTH.

Smelter on Group to Be Ready for Operation in October.

Matters requiring his attention in this State disposed of, Managing Director A. State disposed of, Managing Director A. F. Holden of the United States Mining company departed for Shasta county, California, yesterday, where he will unite vith Frederick Lyon in dispatching the equipment of the Mammoth group of mines, the smelter to go into commission October next. With the condition of the company's properties in this State, and the manner in which the furnaces are discharging their work, Mr. Holden departed very much pleased. He will absent himself until July, visiting the East before returning to this field.

TO RATIFY OPTION.

Ohio Company Directors to Assemble Present Week.

The Freeman option on the Ohio Copper company's interests at Bingham having been relinquished and the document restored to the management, the direct-

Mining Notes.

The Mammoth of Tintle reported with an ther lot of copper ore during the day. cther lot of copper ore during the day.

J. B. Jensen, former manager of the Pioneer samples, leaves for Novada the present week.

Manager Charles W. Whitley of the American Smelling and Befining company has reached Chicago on his way home.

Robert Brown of the great Contennial Eureka of Tinte has returned after relaxing his energies along the shores of the Pacific.

Tony Jacobson, manager of the Columbus Con., has returned from the mines and mill sit Alta much pleased with conditions up there.

Uncle Charley Lammersdorf, who grew up with Gold mountain and by whom the first mill was installed there, is up from his ensule at Richfield. Col. Matt Daugherty has returned from the Carbonate Hill group in Weber conyon, that is being prepared for a campaign of vigorous development.

Hugh Park, for a long time identified with mining interests in this State, is about to eave for San Francisco, where he will take up his residence. Superintendent Nutting of the Bingham Con-melter, who was up from the plant during he day, reports the week's bullion entput a cry satisfactory one.

Henry M. Crowther, general manager of the onthental Alta, left for camp yesterday-serning to be present when the new mill goes ito commission tomorrow. Managor D. C. Jackling and Superintendent Frank G. Janney of the Utah Copper com-pany came in from the plant and properties at Bingham during the sfreezeon.

Don Maruire, through whose energetic en-deavers the mineral-hearing region north of Ogden is being developed and who is achiev-ing good results on the properties of the Sauria Maria company, was down from camp again curing the day.

SALT LAKE SECURITY AND TRUST COMPANY,

As Trustee.

When by reason of ill-health, ad-When by reason of ill-health, advancing age or engrossing cares you find it irksome to manage your property, this company can safely be entrusted to relieve you of your anxieties by taking complete charge of your affairs. Confidential consultations, Open Monday evenings. Security & Trust Bldz.

A certain broker called up a business man at his residence the other day to talk over a mining investment. The business man has both phones in his residence, and so has the broker. Sud-denly the business man said, "Hold on, Bill. I'm on a party line, and I don't want this conversation overheard. Go to the Independent 'phone." And they went. What does this argue? If you want to talk confidentially, you must have the Independent.

have moved to 23 East First South,

April's Dividends Begin to Arrive

Silver King Coming Tomorrow With \$100,000, the Grand Central Company to Follow.

With the distribution of the April divilend, which will occur tomorrow, the sbareholders of the Silver King of Park City will have received, since its addition to the realms of wealth, as much as \$0 -025,000; while of it an official of the company has said that there is now exposed with which to maintain the present distribution for a dozen years or more. That the present production of the bonanza could be doubled without much effort on the part of the management, is the opin on of every interest by which an inven-tory of its ore-bodies has been made, but as the subjects of the sovereign them-selves appear to be quite contented with present disbursements, the present pol-icy undoubtedly will be maintained. Fer-haps the treasury at this time will show a surplus equal to that of any period in the history of the company.

That the Grand Central of Tintic will make its reaspearance the present month take its reappearance the present month to the dividend column. The Tribune has make its reappearance the present month in the dividend column. The Tribune has official assurance, the formal announcement to be made at the meeting of directors at the general offices of the company tomorrow, the distribution to follow on Saturday next, at which time the shareholders will be permitted to draw down 19 cents a share, or 25,099. While the management has not yet reported connection with the ore-bearing channel on the lower level, it is said of the properties that they have been rarely in a confiction which exceeds that of the present, and that the output will be materially increased in a short time. Manager Loose, who was up from the south during the afternoon, says that good progress is being made with the work on the 1300-foot level, and that he hopes to be able to report a connection with the main ore-body the present month. He could not be induced to discuss dividends, however.

Valuable Mining Claims FOR SALE

The following valuable mining claims are situated in Lattle Cortonwood Mining District. Sait Lake County, one mile from Alta, and 28 miles from Sait Lake City.

The Lard Loudon Lode, 1909 linear feet.
The Cress Lode, 1909 linear feet.
The Coal Fit, 1909 linear feet.
Also an undivided interest of 1205 feet of the Lincoln Lode, the entire claim being 1909 feet. Together with the Sanwatorn Tunnel, 1909 feet in length, and located for the purpose of developing the above named claims. For further particulars apply to
